The installation steps of SageMath

YanLei

September 4, 2016

1 Oracle VM VirtualBox

First, you need to download and open it. https://www.virtualbox.org/wiki/Downloads

step one **Choosing next** is the only thing you need to do.

step two Click **File** and find **Import Appliance**

step three Choose the file you've just downloaded. If you don't download, you can get it from https://mirrors.tuna.tsinghua.edu.cn/sagemath/win/index.html

step four Click **Import**

step five The time this step spends is very depends on your computer. So just wait.

step six Click **Shared folders** if you want have one.

step seven Choose a folder and click **OK** and it's all set.

2 Illustrations

There are seven pics which you can get a better understanding.
